

May 22, 2024

Dear FPS Supporter,

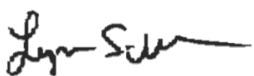

By way of introduction, I am a University of Pennsylvania Perelman School of Medicine's Madlyn and Leonard Abramson Professor of Clinical Oncology and the director of the Tara Miller Melanoma Center at the Abramson Cancer Center. I also am currently serving as the President of the American Society of Clinical Oncology (ASCO) for the 2023-2024 term and recently completed my 15-year tenure as the Chief of the Hematology Oncology Division in the Department of Medicine at Penn Medicine. I am a recognized expert in the field of melanoma with over 30 years of experience. I am writing in unequivocal support of proposal submitted by For Pete's Sake Cancer Respite Foundation (FPS) and encourage you to collaborate in this amazing endeavor to construct the nation's first Cancer Respite Center at Woodloch.

For Pete's Sake Cancer Respite Foundation is a non-profit organization that provides both critical and unique support to patients and their families. Caring for the whole person is what strengthens the patient when they need it most; it promotes resilience for future treatments. FPS provides cancer patients, their families, and caregivers the opportunity to nourish their mind, body, and spirit. I have referred countless patients and loved ones to this organization. The work they do is just transformative for my patients and their families, especially for the children. Please accept this letter as an indication of my wholehearted support of For Pete's Sake Cancer Respite Foundation and their funding request.

Your support for this monumental opportunity will make a meaningful difference in the lives of families across the mid-Atlantic states who are facing the impact of cancer. I appreciate your dedication to serving our community and look forward to your consideration of this request.

Please feel free to reach out to me with any questions you may have about this amazing endeavor.

Sincerely,

Lynn Schuchter, MD

Madlyn and Leonard Abramson Professor of Clinical Oncology

Director, Tara Miller Melanoma Center

President, American Society of Clinical Oncology
