Dear FPS Supporter,

I am writing to encourage you to support For Pete's Sake Cancer Respite Foundation and its endeavor to construct the nation's first Cancer Respite Center at Woodloch.

Skanska, an international construction management firm, has been an annual supporter of FPS through our employee's giving campaigns and has attended FPS events where we witness firsthand the impact of our support on families facing cancer.

I myself am a volunteer on the FPS Building Committee, a committee of volunteer building and construction professionals, charged with oversight of the building aspect of this endeavor. The Building Committee, comprised of all volunteers, has met for the past two years to move the project forward. In 2023, Skanska donated nearly 300 professional hours to cost estimate the Respite Center project in a variety of ways. The company continues to provide pro bono services for the project and will be available to assist with professional services as needed during the construction process.

I hope that you can be part of our trailblazing endeavor and join our community with a leadership naming opportunity. Cancer touches us all, and this gift will be a legacy well beyond my lifetime. I hope you make this legacy about your legacy.

Please feel free to call me with any questions you may have about this amazing endeavor.

Fondly,

A handwritten signature in black ink, appearing to read "W. Craig Hamilton Jr.", with a large, stylized circular flourish at the end.

W. Craig Hamilton Jr.
Project Executive
