

# YOUR GIFT: \$100,000 BUTTERFLY MEADOW

## *Your Legacy*

- Name recognition prominently displayed on a sign as guests drive up to the carport, ensuring high visibility to visitors as they enter and exit the Respite Center.

## *Your Impact*

The Native Butterfly Meadow is designed for beautification, habitat creation and to attract pollinators, like the Monarch butterfly. Butterfly Meadows encourages healthy pollination in the area and creates communities within the ecosystem.

Our Meadow Garden is a focal point as our families and visitors drive-up to our campus and will be the last thing they see before they leave the property.
